Respected sir:

Subject

Application for Biomedical Engineering Position

Dear Hiring Manager,

I am writing to express my interest in an opportunity within your organization as a Biomedical Engineering student. I am currently pursuing my degree in Biomedical Engineering and have developed a strong foundation in medical instrumentation, human anatomy, and healthcare technologies.

During my academic journey, I have gained practical exposure through internships and training, where I observed the working, maintenance, and calibration of biomedical equipment. I have also worked on projects such as a heart rate monitoring system and a patient health monitoring system, which strengthened my understanding of real-world medical applications.

In addition, I have actively participated in paper presentations and technical events on topics such as Artificial Intelligence in Healthcare and wearable health monitoring systems. These experiences have enhanced my research, analytical, and communication skills.

I am a quick learner, adaptable, and passionate about contributing to advancements in medical technology. I would welcome the opportunity to be a part of your organization and contribute my skills while continuing to learn and grow.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Your sincerely,

Dharshika

Resume

Residence:

**No 3, west Street,
Aalampalayam,
Thiruppur 638661
Mobile no: 9629076642
Email id: dharshika.mathavan@ gmail .com**

Career objectives:

**pursue a challenging career in the field of Biomedical Engineering where I can apply my technical knowledge and skills to contribute to healthcare innovation.
To work in a dynamic organization that offers opportunities for learning, growth, and development.**

To contribute towards improving medical technologies and patient care through research and innovation.

Technical skills:

**Basic knowledge of biomedical instruments (ECG, EEG, EMG, MRI)
Understanding of human anatomy and physiology
Medical device design fundamentals**

**Programming languages: Python / MATLAB (basic level)
Software tools: AutoCAD, SolidWorks (basic)
Signal processing basics**

Internship and training:

Completed internship at a hospital/biomedical company

Observed maintenance and working of biomedical equipment

**Assisted in calibration and troubleshooting of medical devices
Undergone training in:**

Medical equipment handling and safety

Basics of hospital equipment management

Paper presentation:

Presented a paper on “Artificial Intelligence in Healthcare”

Presented a paper on “Wearable Health Monitoring Devices”

Participated in national/state-level symposiums

Developed presentation and communication skills

Paper publications:

Published a paper on “Smart Health Monitoring System” in a student journal/conference

Contributed to research on biomedical innovations

Gained knowledge in research methodology and documentation

Certificated courses:

Completed certification in Biomedical Instrumentation

Completed online course on Introduction to Artificial Intelligence in Healthcare

Certification in Medical Coding / Clinical Data Analysis (optional)

Completed workshop on IoT in Healthcare

Co curricular activities:

Participated in symposiums, workshops, and seminars

Member of biomedical engineering association/club

Participated in technical quizzes and poster presentations

Attended guest lectures on recent medical technologies

Strengths:

Strong analytical and problem-solving skills
Quick learner and adaptable to new technologies

Good communication and teamwork skill

Passion for healthcare innovation

Time management and organizational skills
